ABOUT THE INSTITUTE

The PHFI Institute of Public Health Sciences (PHFI-IPHS), Deemed to be University, is India's premier institution dedicated exclusively to advancing education, research, and practice in public health notified under the Distinct Category of UGC (Deemed to be Universities) Regulations 2023.

Rooted in the distinguished legacy of the Public Health Foundation of India (PHFI), the University builds upon more than a decade of pioneering work carried out by the Indian Institutes of Public Health (IIPHS) established across the country. The Deemed University currently encompasses the Main campus at Hyderabad, with constituent units at Bengaluru, and Bhubaneswar, while PHFI's other institutes – including IIPH Gandhinagar, IIPH Delhi, and IIPH Shillong – continues to strengthen the broader national public health network.

Together, these institutions form a pan-India ecosystem of teaching, research, capacity building, and policy engagement. Supported by a distinguished national pool of faculty, researchers, and practitioners, PHFI-IPHS draws on the collective expertise and experience of India's leading public health professionals to address the country's evolving health challenges.

PHFI-IPHS currently offers postgraduate programs and specialized training designed to equip students with the knowledge, analytical skills, and leadership required to strengthen health systems and promote equity in health at local, national, and global levels.

PROGRAM OVERVIEW

The PHFI Institute of Public Health Sciences (Deemed to be University) marks a new milestone in India's public health education landscape. Building upon the strong legacy of the Indian Institutes of Public Health the University continues the mission of the Public Health Foundation of India (PHFI) - to strengthen public health capacity, research, and leadership across the country.

The Master of Public Health (MPH) is the flagship program of the PHFI Institute of Public Health Sciences, designed to equip students with the knowledge and skills to address pressing public health challenges.

Master of Public Health (MPH)

Duration: Two Years (Full-time)

Mode: Regular Classroom with Field Exposure

Intake:

Hyderabad - 60

Bhubaneswar - 30

Note: *The commencement of the MPH program at Bengaluru is proposed at a later stage.*

ACCREDITATION & RECOGNITION:

The PHFI Institute of Public Health Sciences (Deemed to be University) has been notified by the Ministry of Education, Government of India under Section 3 of the University Grants Commission (UGC) Act, 1956.

The PHFI-IPHS is empowered to award degrees as specified by the UGC and operates in accordance with the provisions of the UGC (Institutions Deemed to be Universities) Regulations, 2023.

The PHFI-IPHS is committed to maintaining the highest standards of academic quality, integrity, and regulatory compliance. Institutional accreditation through the National Assessment and Accreditation Council (NAAC) and program-level recognition from relevant statutory and professional bodies will be pursued as per UGC guidelines

Objective

The Master of Public Health program is designed to prepare competent public health professionals with advanced knowledge in

- Analytical and assessment skills for collecting and interpreting information
- Policy planning and development skills to address public health challenges
- Communication skills for advocacy, dissemination and evaluation of public health data and information
- Financial planning and management skills for running public health programs in the country
- Leadership skills

The 2-year MPH program emphasizes evidence-based practice, research methodology, and practical application of public health principles to address contemporary health challenges in India and globally.

Core Competencies

Graduates of the MPH program will demonstrate the following core competencies:

- Apply the course learning to the public health system and its challenges
- Demonstrate adequate knowledge and skills to a wide range of public health topics
- Critically conduct the situational analysis and develop action plan for identified public health issues
- Develop workforce for taking public health related responsibilities in defined geographical areas
- Develop an understanding of the epidemiological transitions of programs specific to each State within the country in order to prioritize public health challenges for policy making

Career Preparation

This multidisciplinary MPH integrates theoretical knowledge with research and experiential learning, preparing graduates for impactful roles in:

- Health systems management and service delivery
- Health policy analysis, formulation, and implementation
- Epidemiology and disease surveillance
- Public health and implementation research
- Community and primary health care practice
- Biostatistics and Data Management

ELIGIBILITY CRITERIA

Candidates seeking admission to the MPH program must fulfill the following eligibility requirements:
