About

The PHFI Institute of Public Health Sciences (PHFI-IPHS) Deemed to be University, is India's premier institution dedicated exclusively to public health education, research, and practice.

Rooted in the legacy of the Public Health Foundation of India (PHFI), PHFI-IPHS builds upon the pioneering work of Indian Institutes of Public Health across the country. The institute currently encompasses the campuses at Hyderabad, Bengaluru, and Bhubaneswar that continue to strengthen the national public health network. Together, these institutes form a pan-India ecosystem of teaching, research, and practice, supported by a national pool of eminent faculty and public health experts, ensuring that PHFI-IPHS draws on the collective strength of India's top public health institutions.

PHFI-IPHS currently offers postgraduate programs designed to equip students with the knowledge, skills, and leadership to tackle India's and the world's pressing public health challenges.

Globally Ranked, Industry Driven

Our sponsoring body - PHFI was recently ranked #2 in the world by the Public Health Academic Ranking (PHAR), surpassing leading institutions such as Harvard and Johns Hopkins. With academic autonomy, innovative curricula, and a nationwide network of expertise, PHFI-IPHS is shaping the next generation of leaders in public health.

TESTIMONIALS

SNEHA DAS
2022-24

The Indian Institute of Public Health (IIPH Hyd) now PHFI-IPHS DU has been pivotal in my development as a public health professional. Through the MPH program and research opportunities, I gained skills in mixed-methods research, qualitative mental health data, and climate risk evaluation. Currently, as a Consultant-Research Assistant on a Wellcome Trust project, I enhance qualitative mental health data methodologies and collaborate with international partners.

DR. K. HOTHASAI SRINIVAS

Proud to be a graduate of the Master of Public Health from IIPH Hyderabad, now PHFI-IPHS Deemed to be University. With a background in dentistry, the program enabled me to transition toward population level public health by strengthening my research and analytical skills and deepening my understanding of health systems and equity.

DR. K. SOUMYA
2022-25

Transitioning from medicine to public health, my MPH journey at PHFI Institute of Public Health Sciences (Deemed to be University) strengthened my passion for community health. The strong academic foundation, meaningful field exposure, and consistent mentorship prepared me well for real-world practice and helped me secure a placement at Basavatarakam Indo American Cancer Hospital & Research Institute even before my final results. I am deeply grateful to PHFI IPHS for shaping my purpose and direction in public health.

KONGARI KIRAN
2019-21

Pursuing my Master of Public Health at Indian Institute of Public Health, Hyderabad, now PHFI-IPHS played a crucial role in shaping my transition into public health. The Program strengthened my foundation in public health surveillance, maternal and child health, health planning and management, and monitoring and evaluation.
